EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Applied Sciences in Computer Engineering

Sep. 2025 – Sep. 2030

- Coursework: C++ Programming, Microcontrollers, Calculus, Linear algebra, Classical Mechanics
- Scholarships: President's Scholarship of Distinction, David Johnston International Student Entrance Scholarship, International Student Entrance Scholarship

EXPERIENCE

Software Intern

Remote, Canada

Bharat Denim

Jul. 2025 - Aug. 2025

- Gained hands-on exposure to the backend architecture of an inventory management system supporting 10,000+ customers and 5,000+ inventory items, under the guidance of the tech lead.
- Utilized Python, SQL, and C++ to optimize database queries and automate data-entry workflows, contributing to a 15% reduction in daily processing time.

School Prefect and Head of Physics Department

New Delhi, Delhi

Springdales School

2024-2025

- Led student initiatives as Head of Physics Department; coordinated events and earned recognition for leadership and organization.

PROJECTS

UW Login Helper | *Python, JavaScript, HTML, CSS*

- Developed a custom Chrome extension using JavaScript, HTML, and CSS to automate University of Waterloo portal login, enabling one-click autofill for streamlined student access.
- Leveraged browser APIs to securely store and pre-fill credential data, improving user experience and reducing repetitive login steps for hundreds of portal users.
- Implemented intuitive UI and robust error handling to ensure reliability across platform updates, resulting in increased productivity and positive feedback from the student community.

Portfolio Website | *TypeScript, HTML, CSS*

- Created a personal portfolio website using TypeScript, HTML, and CSS to showcase programming projects, skills, and professional achievements.
- Integrated responsive design and interactive elements to enhance user experience and accessibility across devices.

AI-Powered Netflix Recommendation Engine | *React, TypeScript, Tailwind CSS, Supabase, Lovable AI*

- Developed an intelligent questionnaire application using React and TypeScript that leverages AI-driven conversation flow to generate personalized Netflix recommendations based on user mood, preferences, and viewing context.
- Architected a context-aware AI system with custom prompt engineering that analyzes conversation history to determine confidence thresholds, ensuring recommendations are only generated when sufficient user preference data is collected, resulting in highly personalized content suggestions.
- Built responsive UI components with Tailwind CSS and implemented secure backend infrastructure using Supabase for scalable APIs, CORS, and real-time edge functions.

Medical AI Chatbot Concept | *Python, Machine Learning, Mobile/Web Development*

- Conceptualized a scalable healthcare AI chatbot system aimed at improving medical advice delivery and disease tracking in rural India through accessible mobile and web interfaces.
- Researched previous disease trends for prevention and treatment strategies, analyzed death rates, and studied how fast diseases may spread to inform predictive algorithm design.

TECHNICAL SKILLS

Languages: Python, C++, SQL/MySQL, JavaScript, HTML/CSS, TypeScript

Frameworks: React, Node.js, Vue.js

Developer Tools: Git, VS Code, Visual Studio, PyCharm, GitHub, Microsoft Powerpoint

Libraries: pandas, NumPy, Tkinter
